Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

Digest

Agricultural Exports Strong in 1995 (see p. 2)--U.S. agricultural exports set a record for the first 5 months of fiscal year (FY) 1995 because of strong demand for U.S. bulk commodities and continued demand for U.S. high-value products (HVP). Exports totaled \$23.3 billion for October 1994-February 1995, 22 percent higher than the same period a year earlier. U.S. exports advanced to most major markets, and growth to China was especially strong.

Agricultural Imports Gain 12 Percent in Early FY 1995 (See p. 6)--U.S. agricultural imports for fiscal 1995 to date (October 1994 to February 1995), gained 12 percent over the same period in fiscal 1994. At \$12.1 billion, agricultural import value was the highest ever for the period.

California Top Exporter in FY 1994 (see p. 8)--The United States exported \$43.5 billion worth of agricultural commodities in fiscal 1994, about \$900 million more than the previous year. For the 10th consecutive year, California was the top exporter of agricultural commodities. Illinois ranked second, followed by Texas, Nebraska, Iowa, Kansas, Indiana, Washington, Minnesota, and Arkansas. In addition to the top 10 States, Florida, Ohio, North Carolina, and North Dakota shipped over \$1 billion worth of commodities.

Notice

FATUS tables A-2 and B-3 are now available over the **CALL-ERS/NASS** electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

Agricultural Exports Strong in 1995

U.S. agricultural exports set a record for the first 5 months of fiscal year 1995 because of strong demand for U.S. bulk commodities and continued demand for U.S. high-value products (HVP). Exports totaled \$23.3 billion for October 1994-February 1995, 22 percent higher than the same period a year earlier. U.S. exports advanced to most major markets, and growth to China was especially strong.

Bulk Exports Lead Growth

Bulk exports totaled 56.3 million tons, 26 percent higher than in fiscal 1994. Corn increased 48 percent to 23.4 million tons, and soybeans rose 29 percent to 12.6 million tons. The value of bulk exports also increased 26 percent to \$10.6 billion as all major bulk commodities gained in value.

Wheat shipments declined 5 percent to 13.7 million tons, but export value rose 7 percent to \$2 billion because of higher export prices in 1995. Total global demand for wheat imports is lower in 1995, but a drought-reduced crop in Australia has put upward pressure on global wheat prices. U.S. wheat shipments were up sharply to Egypt and Pakistan at 2.8 million tons and 1.1 million tons, respectively. But U.S. exports to the former Soviet Union (FSU) fell 74 percent to 260,000 tons, and shipments were also lower to Japan, Korea, and Taiwan.

Rice shipments rose 70 percent to 1.9 million tons, but export value only gained 38 percent to nearly \$500 million because of lower export prices. Brazil was the leading market for U.S. rice with imports of 349,000 tons, followed by the European Union (EU) with 200,000 tons. Shipments to Japan plummeted to 2,000 tons, compared with 129,000 tons in 1994.

U.S. corn exports jumped to 23.4 million tons because China reduced its exports, and lower U.S. corn prices boosted U.S. export opportunities, particularly in Asian markets. Sales to Japan rose 14 percent to 6.6 million tons, and exports to Korea topped 3.5 million tons compared with 53,000 tons last year. Southeast Asian countries purchased 501,000 tons compared with 1,000 tons in 1994. As China reduced corn exports it also increased its imports, and the United States shipped 773,000 tons there through February.

Strong demand for soybean meal and oil, and lower U.S. soybean prices, compared with 1994, boosted soybean exports. Exports to the EU rose 25 percent to 6.4 million tons, and large gains also went to Brazil, Mexico, Korea, and Taiwan. Shipments to Japan were down slightly.

Cotton exports rose 81 percent to more than 1 million tons. Most of the increase was to China, Japan, and markets in East and Southeast Asia. Reduced exports from Pakistan and India spurred U.S. cotton exports and raised world cotton prices. The average export price for October-February was \$1,641 per ton, compared with \$1,315 per ton last year. Because of this strong price increase and high volume demand, the value of U.S. exports soared 125 percent to \$1.7 billion.

HVP Shipments Continue Upward

HVP exports reached \$12.8 billion, 19 percent over last year. Higher exports of red meat, poultry meat, fruits, and vegetables continued to lead HVP export growth. Beef exports reached \$984 million, as exports to Japan gained 21 percent to \$583 million, sales to Korea rose 35 percent to \$109 million, and exports to Mexico increased 46 percent to \$76 million. Poultry meat exports gained 44 percent to \$767 million. Russia and Hong Kong were still the leading markets for U.S. poultry meat. Exports to Russia rose 99 percent to \$188 million, and exports to Hong Kong rose 93 percent to \$153 million.

Fruit and vegetable exports rose 25 percent to nearly \$2.9 billion with strong sales to Canada, the EU, Japan, and East and Southeast Asia. Fruit exports were over \$1 billion. U.S. exports to Japan increased 21 percent to \$230 million, making Japan the leading market, followed by Canada (\$226 million) which is usually the leading market. Exports were 26 percent higher to Southeast Asia, 13 percent higher to East Asia, and 12 percent higher to the EU.

Vegetable exports increased 36 percent to \$1.9 billion as shipments to Canada jumped 46 percent to \$680 million. Sales to the EU rose 36 percent to \$202 million. In fiscal 1994, U.S. exports of vegetables were at record levels to many Asian markets, and this strong movement has carried into fiscal 1995. Vegetable exports to Japan increased 49 percent to \$335 million, shipments

to Hong Kong, Korea, and Taiwan rose 29 percent to \$159 million, and sales to Southeast Asia gained 26 percent to \$67 million.

China Is Major Growth Market

U.S. export growth in fiscal 1995 has been strong to most major markets. Exports to Canada, Mexico, and the EU rose by 15-17 percent, and growth to Japan and Taiwan was low at 8 percent and 3 percent, respectively. Sales to Egypt almost doubled to nearly \$600 million because of strong wheat shipments, and exports to Brazil jumped from \$115 million to \$435 million due to soybean, rice, and corn shipments.

But growth to China was especially strong as U.S. sales totaled \$855 million compared with \$155 million last year because of strong cotton, corn, and soybean oil shipments. Cotton shipments reached \$421 million through February compared with \$7 million last year. Even though world prices were very high, China continued to purchase U.S. cotton to meet its domestic demand. U.S. corn exports reached \$83 million, the highest level of exports since fiscal 1982, compared with no

exports last year. U.S. soybean oil exports reached \$167 million due to strong demand for vegetable oil in China.

U.S. exports to Mexico continue to be higher than a year ago but growth slowed in 1995. Exports were 16 percent higher at \$1.7 billion from October 1994-February 1995, but January-February exports were 21 percent lower than in 1994. The December peso devaluation raised import prices and slowed demand for imported goods, especially meats, fruits, and vegetables, which had been advancing rapidly in 1994.

The FSU continues to be the exception for U.S. exports growth. Exports fell slightly in fiscal 1994, and year-to-date 1995 exports were more than 50 percent below last year. The reason was continued weak demand for bulk exports, mainly feed grains and wheat. However, some consumer food exports gained. In addition to strong poultry meat sales, pork exports rose 34 percent to \$35 million, variety meats doubled to \$15 million, and vegetable exports gained 38 percent to \$23 million. (*Joel Greene, Trade Analysis Branch, 202-219-0816*).

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Agricultural Imports Gain 12 Percent in Early FY 1995

U.S. agricultural imports for fiscal 1995 to date (October 1994 to February 1995), gained 12 percent over the same period in fiscal 1994. At \$12.1 billion, agricultural import value was the highest ever for the period.

Coffee, vegetables, rubber, vegetable oils, wine and beer, and cattle contributed to a \$1.3 billion increase. Tobacco, wheat, meats, orange juice, and oats declined. Canada and Mexico were the leading import sources, at \$2.1 and \$1.5 billion, respectively; both increasing from the previous year. Brazil was the third largest source with shipments of \$695 million, unchanged from fiscal 1994.

Noncompetitive Commodities

Of the \$1.3 billion increase in total U.S. agricultural imports during October-February, \$800 million was due to higher coffee shipments which reached \$1.5 billion. Unit values for coffee of \$3,800 per ton was double the year earlier level. Coffee import volume fell 7 percent to 389,000 tons because of sharply higher coffee prices. Coffee prices rose because production shortages in Brazil coincided with low stocks in major consuming countries. Rubber value increased 54 percent to \$183 million on steady volume. Low production in Malaysia pushed world prices up for the period. Banana imports increased 10 percent to \$443 million due to increased consumption.

Competitive Commodity Imports

Competitive commodity imports advanced 2 percent, or \$200 million, during October-February to reach \$8.6 billion. Horticultural commodities gained the most, followed by vegetable oils, non-juice beverages, and cattle. Tobacco, beef and pork, and fruit juice values fell. Grain and feed import volume declined.

Horticultural Commodities

October-February vegetable imports were \$1.4 billion, \$192 million over the previous year. Mexico accounted for \$114 million of the gain. Strong imports of winter fresh vegetables reflected NAFTA and shortages of broccoli, cauliflower, and onions due to flooding in California. Since December, the peso devaluation has made Mexican vegetables very attractive in the U.S. market.

Mexico accounted for \$685 million, almost half the total vegetable import value during the October 1994-February 1995 period. The European Union, the main source for olives and prepared vegetables, accounted for \$204 million, or 15 percent. Squash and peppers from Mexico, and canned mushrooms from Indonesia were among vegetables which gained.

October-February fruit import value of \$590 million was 7 percent over last year. Import value for grapes from Chile and melons from Mexico were up 16 and 14 percent, respectively. Nut import value rose also, gaining 7 percent over last year to \$226 million. Pecans, shipped to Mexico for processing, and re-exported to the United States, accounted for much of the gain.

Vegetable Oil Imports

Higher world prices for coconut, palm oil, and palm kernel oil pushed import values up for the first 5 months of the fiscal year. Tropical oils from Asia comprised nearly two-thirds of total vegetable oil import volume. Canadian shipments, primarily rapeseed oil, were 29 percent of volume. Europe shipped 10 percent of U.S. vegetable oil imports, mostly olive oil. High world demand for vegetable oils (especially in China), lower production in Malaysia, and the residual effect of last year's low U.S. soybean production, caused import unit values to surge 29 percent to \$840 per ton.

Grain and feeds declined 22 percent to 3.3 million tons although higher unit values caused U.S. import value to rise slightly. Larger U.S. wheat, oat, and barley production reduced Canadian shipments by 800,000 tons. The change was due to record production in the United States following low production in 1993. Wheat imports fell by nearly 500,000 tons to 616,000 tons. Overall feed grain volume fell 27 percent to 1.4 million tons.

Import Losers

Some commodities declined markedly. Unmanufactured tobacco imports fell by more than half as U.S. cigarette manufacturers limited foreign leaf content in U.S. cigarettes beginning in January 1994. Fiscal year to date shipments totaled \$240 million compared with \$548 million last year. Much of last fiscal year's tobacco was imported between October and December 1993 before domestic content requirements took effect. Turkey, the largest supplier of tobacco to the

United States, saw its total exports to the United States decline 17 percent for the October 1994-February 1995 period.

Meat shipments declined 13 percent in value to \$980 million from the same period last year. Lower beef volume from all sources except New Zealand, and low prices in the United States, pushed meat import value down 13 percent to \$980 million. Australian exports have been curtailed by the drought there. Pork import value

declined as well, falling 14 percent to \$268 million. Fiscal 1995 volume of 109,000 tons was 19 percent lower than last year.

Orange juice import volume fell 23 percent to 4.7 million hectoliters. October-February imports were down because near-record orange production in 1994 has increased domestic juice availability.

***(Tom Capehart, Trade Analysis Branch,
202-219-1262).***

California Top Exporter in FY 1994

The United States exported \$43.5 billion worth of agricultural commodities in fiscal 1994, about \$900 million more than the previous year. For the 10th consecutive year, California was the top exporter of agricultural commodities. Illinois ranked second, followed by Texas, Nebraska, Iowa, Kansas, Indiana, Washington, Minnesota, and Arkansas. In addition to the top 10 States, Florida, Ohio, North Carolina, and North Dakota shipped over \$1 billion worth of commodities.

The top 10 exporting States were the same as in 1993 except that Arkansas moved up and North Dakota dropped to 11. The top 10 States accounted for 58 percent of total U.S. agricultural exports, unchanged from last year. Several States that export a large portion of wheat, feed grains, and soybeans had unusually large declines in exports because of the production shortfalls caused by the flooding in the summer of 1993. Shipments of wheat, feed grains, and soybeans fell 18 percent to 87 million tons in fiscal year 1994, and the value of bulk exports declined 5 percent to \$17.6 billion. Total agricultural exports gained 2 percent over 1993, as high-value product exports rose 8 percent to a record \$25.9 billion. States that export fruits, vegetables, and meats gained export share in 1994.

California's estimated exports increased 16 percent to \$6.4 billion in 1994 because of strong increases in horticultural exports. California exported \$4.2 billion worth of fruits, tree nuts, and vegetables which accounted for 65 percent of its total exports. California was also the leading exporter of seeds (\$113 million), and ranked second in cotton (\$295 million), cottonseed (\$21 million), and dairy (\$120 million) exports.

Illinois moved into the second position with estimated exports of slightly over \$3 billion. Illinois was the leading exporter of feed grains (\$1.1 billion) and soybeans (\$1.2 billion). Iowa had been the second leading exporter since 1991, but Iowa's flood-ravaged production in 1993 led to a sharp drop in its feed grain (\$761 million compared with \$1.2 billion in 1993) and soybean (\$776 million compared with \$1 billion) exports. Iowa fell to the fifth position at \$2.4 billion, a decline of 22 percent.

Texas estimated exports increased 20 percent to nearly \$3 billion, and moved Texas into the third position. Texas gained export share because

cotton exports more than doubled to \$737 million, and livestock and meat product exports rose 11 percent to \$585 million. Nebraska followed Texas with exports of \$2.5 billion, a 2-percent gain. Nebraska was the leading exporter of livestock and meat products (\$656 million), hides and skins (\$257 million), fats, oils, and greases (\$93 million), and feeds and fodders (\$207 million).

Kansas exports were \$2.2 billion, about the same as last year. Kansas wheat exports declined 10 percent to \$600 million, but Kansas gained export share in feed grains (\$398 million) and livestock and meat products (\$235 million). Indiana moved into the 7th position as exports increased 15 percent to \$1.6 billion. Indiana feed grain exports rose 11 percent to \$616 million and soybeans rose 24 percent to \$673 million.

Washington, Minnesota, and Arkansas rounded out the top 10 with exports of \$1.6 billion, \$1.4 billion, and \$1.2 billion, respectively. Washington exports gained 19 percent on increased fruit (\$496 million), vegetable (\$386 million), and wheat (\$399 million) exports. Minnesota exports fell 28 percent because of a 50-percent drop in wheat exports to \$178 million, a 40-percent drop in feed grains to \$299 million, and a 28-percent drop in soybeans to \$347 million. Arkansas moved into the 10th position even though exports dropped slightly. Arkansas was the leading rice (\$339 million) and poultry (\$241 million) exporter.

Besides large declines in Iowa and Minnesota, estimated exports for Missouri and North Dakota fell sharply in 1994. Missouri exports fell 19 percent to \$891 million because of lower feed grain (\$191 million) and soybean (\$358 million) exports. North Dakota exports fell 20 percent to \$1.2 billion. North Dakota remained the leading wheat exporting State but exports declined 18 percent to \$863 million. North Dakota was also the leading sunflowerseed exporter, but exports dropped 26 percent to \$71 million.

Three States that were not top 10 exporters were leaders of individual commodities. Georgia was the largest exporter of peanuts and products at \$90 million, North Carolina was the leading tobacco exporter with sales of \$535 million, and Wisconsin was the leading exporter of dairy products at \$172 million.

Methodology

The Economic Research Service (ERS) uses agricultural export data compiled by the U.S.

Bureau of Census. The Bureau of Census reports U.S. exports by the quantity and value, destination, and customs district. ERS estimates a State's share of U.S. exports based primarily on a State's production share of the exported commodity. The State share is an estimate, and the export value for each State should not be interpreted as an actual measurement of a State's exports. Commodities from various States are commingled in transit from farmgate to port because an agricultural commodity is likely to pass through several States, and little data exists on shipments between States. The actual measurement of trade occurs at the port of exit.

In allocating State export shares, ERS uses the National Agricultural Statistical Service's (NASS) crop, dairy, fruit, livestock, poultry, and vegetable production estimates. In some cases, supplemental data such as the Census of Agriculture, 1992 and the Department of Commerce's estimates for Exports from Manufacturing Establishments: 1990 and 1991 are used to estimate and adjust export shares. The data for 1990-1993 is revised to reflect revisions in production data, and updated Census of Agriculture and Exports from Manufacturing Establishments data. (*Joel Greene, Trade Analysis Branch, 202-219-0816*).

1/ Mainly, confectionery, nursery and greenhouse, essential oils, beverages, and other miscellaneous animal and vegetable products.

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-February 1993/94 and 1994/95, and February 1995	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October- February 1993/94 and 1994/95	A-73
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-February 1993/94 and 1994/95	A-74
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-February 1993/94 and 1994/95	A-75
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1993/94 and 1994/95	A-76

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-February 1993/94 and 1994/95, and February 1994 and 1995	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-February 1993/94 and 1994/95, and February 1995	B-5

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

SUMMARY OF REPORT #AER-711

The 1995 Farm Bill

Sugar Quota System, Price Supports Among Key Issues in Policy Debate

April 1995

Contact: Ron Lord, (202) 219-1287

The sugar portion of the 1995 farm bill debate will likely focus on the level and type of support to the industry, as well as the effectiveness of the sugar provisions in the 1990 omnibus farm legislation (entitled the Food, Agriculture, Conservation, and Trade Act). Those issues and others are outlined in ***Sugar: Background for 1995 Farm Legislation***, a new report from USDA's Economic Research Service.

U.S. Sugar Policy

The current U.S. sugar price support program has its origins in 1981 legislation. The foundations of the program are tariff-rate import quotas, domestic marketing allotments, and price supports. They restrict overall supply to help maintain price. The current U.S. minimum price support level, unchanged since the 1985 crop, is based on a raw cane sugar loan rate of 18 cents a pound, raw value. Import quotas have meant that the U.S. sugar price has been largely unaffected by movements in the lower world price.

The 1990 farm legislation added a minimum sugar import requirement of 1.25 million short tons (1 short ton = 2,000 pounds), standby domestic sugar marketing allotments (domestic supply controls), and a marketing assessment of 1 percent of the loan rate, later increased to 1.1 percent. USDA assesses whether or not to implement the standby allotments at the beginning of each quarter of the fiscal year. If imposed, allotments apply to the entire fiscal year, and have been imposed for fiscal years 1993 and 1995.

Several options exist for the U.S. sugar program. Preserving the basic structure of the nonrecourse loan program provides one set of options. To continue price support, a mechanism for domestic supply control is necessary. At the other extreme, the domestic program could be eliminated.

Another factor in this year's debate will be the General Agreement on Trade and Tariffs (GATT). Under GATT, the U.S. is committed to maintain a minimum access level for imports of 1.256 million tons. This commitment precludes domestic sugar legislation from increasing the protection afforded domestic sugar producers from foreign sugar, even if surpluses arise.

The U.S. Sugar Industry

The domestic sugar and sweetener industry is the largest in the world, with total annual consumption of caloric sweeteners approaching 20 million tons a year. The United States is among the top five countries in the world in production, consumption, and imports of sugar. About 83 percent of the sugar consumed in the United States during 1992-94 was produced domestically, with 45 percent from sugarcane and 38 percent from sugar beets.

ERS-NASS
341 Victory Drive
Herndon, VA 22070

Domestic sugar production is expanding rapidly, and is forecast at a record 8.29 million short tons, raw value, in fiscal year 1995. Over the last decade, beet sugar production has expanded an average of over 140,000 tons per year, and cane sugar production has risen more than 40,000 tons per year. Since 1986, sugar use has grown about 2 percent a year, and for 1994/95 is forecast at 9.43 million short tons. High-fructose corn syrup (HFCS) consumption is forecast at 7.4 million tons in 1994/95, and HFCS consumption is growing at about 4 percent a year.

Sugar beets are grown in 14 States and sugarcane in 4 States. Since sugar beets and sugarcane deteriorate rapidly, they are grown only in proximity to a processor and generally only under contract. Technological progress continues to improve efficiency on sugar beet and sugarcane farms and in sugar processing facilities. The U.S. cost of producing sugar is falling both in absolute terms and relative to other countries.

U.S. sugar prices, as supported by Federal farm policy, have stimulated production. By providing a price umbrella, the higher sugar prices stimulated production of alternative sweeteners, such as HFCS, and lowered

sugar consumption. Refined sugar is processed and sold in the United States by 11 companies, with the three largest controlling over half the market. Industry concentration has increased dramatically over the last 3 decades.

The Farm Bill Backgrounders

The report on which this summary is based is one of a series of 12 "Background for 1995 Farm Legislation" publications by USDA's Economic Research Service.

Besides sugar, the topics covered by the reports are wheat, dairy, cotton, rice, feed grains, oilseeds, tobacco, honey, peanuts, export programs, and marketing orders and promotions.

For ordering information, see the box on the front page of this summary.
